

**Loading Position:** To be used only for loading and unloading product from the cabinet  
**Service Position:** To be used when the cold food bar is being used to serve food. In this position it meets the Australian Standards for hygiene for food bars. The unit should not be left in this position for longer than three hours, this may void warranty

**Closed Position:** To be used when the unit is not serving food to retain the cold between servings or help the unit meet operating temperature faster. This unit is not meant to be used as a refrigerator; no product is to be stored in them for an extended period of time. The units need to be switched off after each days trading and wiped clean before the next use.

## Repair & Warranty Procedures

### Warranty Procedure

If your Woodson product is not working whilst still under warranty and has not been subject to improper use or treatment follow the procedure listed below to obtain repairs:

- 1) Follow the trouble shooting procedures on page 8 of the manual to ensure that your product is not working.
- 2) Locate the silver ratings plate sticker on your Woodson product and list the model number and serial number. Also make a clear description of the problem. Please also obtain your proof of purchase.
- 3) Phone or fax through these details stated to our service listed below.
- 4) For all Woodson countertop products (excluding hot and cold food bars). We reserve the right to reject warranty calls where circumstances fail to meet our warranty conditions.
- 5) For all hot and cold food bars. We will arrange for an authorised service technician to visit you as soon as possible (subject to your location). We reserve the right to reject warranty calls where circumstances fail to meet our warranty conditions.

### For General maintenance & Repairs

If your Woodson product requires any maintenance or repairs this must be undertaken by a qualified technician. Woodson have accredited technicians and agents who are experienced in the product and carry commonly used spare parts. Contact our national service number listed below for details of your nearest service agent.

---

## Safety

All Woodson products are manufactured and tested according to relevant national and regional standards. All products comply to our test requirements.

### **This machine contains no-serviceable parts.**

Only Woodson, one of our accredited service agents, or a similarly qualified and licensed person(s) should carry out any repairs. Do not attempt to remove any cover panels, open the machine or access any internal parts.

The Stainless steel manufacturing process used in the construction of this machine may result in sharp edges. We take every effort to remove any such edges, however be careful when contacting any raw edges of the product.

**Hot Food Displays:** This unit can get hot. Ensure everyone is aware that the machine is operating and take care to avoid contact with hot surfaces.

Under no circumstances should the unit be immersed in water. Do not allow any electrical components including cables and plugs to come into contact with water.

If the electrical cables, plug or other connections show any signs of physical damage or wear do not use the machine. In such instances contact Woodson for details of your local repair agents (see page 1). We also recommend regular testing of machine by a trained and qualified technician to ensure it is working effectively and safely.

---

## Compliance

At the time of manufacture Woodson products are designed and made to comply with all relevant Australian Standards.

---

## General precautions

**Every person who is to operate this machine must read this manual or obtain suitable training prior to use.**

**Hot Equipment:** These machines include heating elements. As with any commercial heating appliance the surfaces of this unit will get hot. Do not touch the surfaces of the machine whilst it is in use. Be careful when operating near other machinery. If your machine is in an area where unwary customers or staff can touch the unit you should provide additional warning signage if necessary. To avoid unnecessary risks keep this unit out of reach of children. This product is designed for display of hot food. Woodson cannot guarantee its performance or honour the warranty if used outside its original purpose.

**Cold Food Displays:** The machine includes refrigeration components. As with any commercial refrigeration appliance can get very cold. Remember cold surfaces can burn – do not touch these surfaces when the unit is fully refrigerated. Be careful when operating near machinery. This product is designed for display of cold food. Woodson cannot guarantee its performance or honour the warranty if used outside its original purpose.

Do not operate the machine in any areas where the electrical components may come into direct contact with water.

Always ensure the power cable is not in contact with hot parts of the machine when in use and have any damaged power cords replaced immediately.

Woodson will not accept liability if:

- The instructions in this manual have not been followed properly.
- Non-authorised personnel (persons not nominated by Woodson) have tampered with the machine.
- Non-original spare parts are used.
- The machine is not cleaned according to the instructions in this book.
- There is any physical damage to the machine.

## Contents and packaging

**Woodson** pack your product to limit any possible damage caused as a result of transportation. Please unwrap the box carefully, and do not discard any packaging without checking to ensure you have the following items:

- a) One cold food display
- b) Combination of pots as ordered (if applicable)

Should any item have physical damage, report the details to the freight company and to the agent responsible for the despatch within seven (7) days of receipt. No claims will be accepted or processed after this period.

## Installation

Remove all packing, plastic coating and tape from the stainless steel before installing the machine. Clean off any remaining glue residue from the exterior of the machine with warm soapy water (refer to cleaning instructions on page 6.)

Place the machine on a level and firm work surface with a cut out for the refrigeration unit. Do not position the machine in a wet area or near inflammable substances. Place a bucket underneath the unit to catch the water that will come out of the drain or alternatively fit the drainpipe to an outlet of tundish

Please consult national and local standards to ensure that your machine is positioned in accordance with any existing requirement.

Plug the cold food display into a standard single phase 10 AMP power point.

The self serve bars are not meant to be used as a refrigerator, no product is to be stored in them for an extended period of time. The units need to be switched off after each days trading and wiped clean before the next use.

## Troubleshooting

If the machine is not cooling correctly, check the following before calling out your authorised service agent:

- That the unit is plugged in correctly
- That the power is turned on
- That the power point is not faulty

## Maintenance & Cleaning

### Maintenance

- Clean the unit with a soft sponge and warm soapy water
- To clean the cold plate, ensure the machine is switched off and wash with warm water
- Clean the refrigeration condenser coil with a brush periodically

### Cleaning

Whilst stainless steel is a very hardy and long lasting material, it must be cleaned regularly and according to the instructions below to prevent deterioration.

Always make sure the product is disconnected from the power source and has completely cooled down prior to cleaning.

- Wipe the external surfaces down with warm soapy water using a damp sponge or cloth.
- Do not immerse the unit in water or allow the ingress of water into the interior of the machine or any electrical components.

**Note:** Some cleaning agents can damage stainless steel. For this reason we recommend cleaning with soapy water. Woodson do not take any responsibility for damage caused by the use of inappropriate cleaning agents.

In some areas, particularly seaside environments, stainless steel can be subject to surface discolouration or “tea staining”. This can be removed with an appropriate cleaning agent which contains 10% sodium citrate. Ask your supplier of cleaning chemicals for a suitable brand.

**Note:** Unit should be turned off for a four hour period each week to allow for defrost of coil. All defrost water should be wiped from upper tray & inside unit.

---

## Operating Instruction

Remove all packing, plastic coating and tape from the glass and stainless steel before installing the machine.

- Cross flow ventilation from left to right along the longest side of the unit is required if mounted inside a fixed or mobile cabinet. A perforated area equal to or greater than the flat panels on the LHS and RHS of the compressor compartment is required. We can supply these panels at an extra cost.
- The thermostat is pre-set for correct operating temperature. A preset defrost is included to clear the coil of ice.
- On high humidity days the defrost period may not be enough and the coil may ice up. In these circumstances, when the cabinet has been emptied turn off the unit via the on/off switch so as the temperature starts to rise and the ice melts. When the coil has defrosted turn the unit back on.
- The self serve bars are not meant to be used as a refrigerator, no product is to be stored in them for an extended period of time. The units need to be switched off after each days trading and wiped clean before the next use.
- The refrigeration system will work most effectively with the doors in the closed position. The unit is designed not to be used with the doors in the service position for more than three hour periods. Operating for more than three hours in the service position may void warranty.
- With the doors in the service position the unit will absorb more moisture, if you are draining the water into a bucket ensure it is checked on a regular basis. Check the drain on a regular basis and ensure it is draining properly and not backing up into the unit.
